Journal of Hydrology

Contents

Foreword 1

Modelling of rainfall, flow and mass transport in hydrological systems: an overview
P.E. O'Connell and E. Todini 3

Stochastic point process modelling of rainfall. I. Single-site fitting and validation
P.S.P. Cowpertwait, P.E. O'Connell, A.V. Metcalfe and J.A. Mawdsley 17

Stochastic point process modelling of rainfall. II. Regionalisation and disaggregation
P.S.P. Cowpertwait, P.E. O'Connell, A.V. Metcalfe and J.A. Mawdsley 47

Modelling the effects of spatial variability in rainfall on catchment response. 1. Formulation and calibration of a stochastic rainfall field model
S.M.S. Shah, P.E. O'Connell and J.R.M. Hosking 67

Modelling the effects of spatial variability in rainfall on catchment response. 2. Experiments with distributed and lumped models
S.M.S. Shah, P.E. O'Connell and J.R.M. Hosking 89

The Modified Turning Bands (MTB) model for space–time rainfall. I. Model definition and properties
D. Mellor 113

The Modified Turning Bands (MTB) model for space–time rainfall. II. Estimation of raincell parameters
D. Mellor and P.E. O'Connell 129

The Modified Turning Bands (MTB) model for space–time rainfall. III. Estimation of the storm/rainband profile and a discussion of future model prospects
D. Mellor and A.V. Metcalfe 161

Use of the SHE hydrological modelling system to investigate basin response to snowmelt at Reynolds Creek, Idaho
J.C. Bathurst and K.R. Cooley 181

SHESED: a physically based, distributed erosion and sediment yield component for the SHE hydrological modelling system
J.M. Wicks and J.C Bathurst 213

Flood propagation models for real-time forecasting
P. Lamberti and S. Pilati 239

A conservative finite elements approach to overland flow: the control volume finite element formulation
P. Di Giammarco, E. Todini and P. Lamberti 267

Physical interpretation and sensitivity analysis of the TOPMODEL
M. Franchini, J. Wendling, C. Obled and E. Todini 293

The ARNO rainfall–runoff model
E. Todini 339

Contaminant transport in heterogeneous porous media: a case study. 1. Site characterisation and deterministic modelling
R. Mackay and T.A. Cooper 383

An analysis of the dynamic component of the geomorphologic instantaneous unit hydrograph
M. Franchini and P.E. O'Connell 407

Contaminant transport in heterogeneous porous media: a case study. 2. Stochastic modelling
R. Mackay, T.A. Cooper, A.V. Metcalfe and P.E. O'Connell 429

An extended formulation of the integrated finite difference method for groundwater flow and transport
M. Ferraresi and A. Marinelli 453

Modelling of contaminant migration in a chalk aquifer
R. Little, E. Muller and R. Mackay. 473
Stochastic storm transposition coupled with rainfall– runoff modeling for estimation of exceedance probabilities of design floods
M. Franchini, K.R. Helmlinger, E. Foufoula-Georgiou and E. Todini 511
Flood risk assessment using an integrated hydrological and hydraulic modelling approach: a case study
V. Anselmo, G. Galeati, S. Palmieri, U. Rossi and E. Todini 533
Influence of parameter estimation uncertainty in Kriging
E. Todini and M. Ferraresi 555
A solution to the inverse problem in groundwater hydrology based on Kalman filtering
M. Ferraresi, E. Todini and R. Vignoli 567
Validation of catchment models for predicting land-use and climate change impacts. 1. Method
J. Ewen and G. Parkin 583
Validation of catchment models for predicting land- use and climate change impacts. 2. Case study for a Mediterranean catchment
G. Parkin, G. O'Donnell, J. Ewen, J.C. Bathurst, P.E. O'Connell and J. Lavabre. 595
